

Technical Data Sheet

QUALIX – SQ-400

SQ-400: is a powerful new generation sequestering agent which has a very high stability at high temperature and pressure and effective over wide range of PH due to its high performance and cost effectiveness many leading process houses accepted SQ-400 in place of conventional chelating agents such as EDTA Metaclaw and chelashok

Scouring: Scouring process in textile is used to remove natural oils wax grease soil etc due to metallic ions in water they form metallic soap which deposit on fabric and given poor scouring and rough feel to the cloth in normal water 0.1% of SQ-400 will help to overcome this problem in hard water may have to be increased up to 0.5% depending upon its hardness

Mercerizing: Iron in caustic lay gives yellow tint to the cloth use the SQ-400 will help in overcoming this problem if the cloth after mercerizing is taken for peroxide boil iron acts as catalyst and thus due to oxidation loss of tensile strength or pin holes are formed in the fabric SQ-400 bind the iron from printing on making it inactive

Peroxide bleach: Depending upon the hardness of water 0.5% to 1gm/lit SQ-400 when used in peroxide boils gives superior whiteness to the cloth and also helps to avoid scale formation

Dyeing: The presence of trace metals adversely affect shade and fastness of any dyed Use 1gm /lit to 2gm/lit of SQ-400 in dyeing of polyester Cationic and Cotton fabric it is very useful in developing brighter and cleaner shade with superior fastness it is very in high temperature high pressure Beam dyeing and Jet dyeing to get brighter and leaner shade on the fabric the feel of the fabric is also improved at the time of Finishing process

Printing:

Quality Chem

Manufacturer, Importers & Exporters

-----ISO 9001:2000 Certified Company-----

U-22, Yash Shopping Center, Opp. Jivan Jyot Cinema, Udhna, Surat, Gujarat 394210

e-mail: info@hytechsurat.com Ph: (0261) 2275866, Mo: 98252 91596/ 9377090700

work: prabhuvandana Compound, Opp. Dhruv Motors Udhna, Surat

SQ-400: is useful in all types printing paste when water is hard since prevents precipitation of Calcium Magnesium and iron salts

SQ-400

Specification:

Commercial form	Clear liquid
Active agent	100%
PH of 1% Solution	7.0 +/- 0.5
Solubility	Soluble in cold water Methanol and Aqueous acids
Packing	50 kg in drum packaging

Application:

Water treatment chemicals textile dyeing, printing, soaps & detergent sugar manufacturing oil field depends on hardness of water.
